

C++2: Lesson 1 – Interview

1. Add **summary** at the top and **comments** where necessary.
 - Recordings and interviews are an exception, but they should be included in your submission code.
2. **Cite** the source of your information.
3. Refrain from including anything **you don't fully understand**.

2

100 points

5-min challenge: you will get full credit after you reproduce your work during a class or interview.

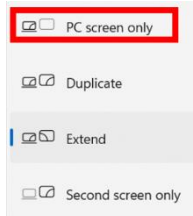

Create a file **myInfo.txt** and write your **full name** followed by the **last four digits** of your cell phone number in the file. Make sure that the file is properly closed after writing the data.

***Note:**

-Before an interview, make sure to open your **IDE** and be prepared to demonstrate your work.

-When asked to share your screen, remember to **share the entire screen** (<https://bit.ly/3INpkJV>), not just a specific application.

- If you are using multiple screens, disconnect all screens except for the main one (Use the **Win + P** shortcut, and select "**PC screen only**") and then display the programs you are running by pressing **Alt + TAB**.

***Editing your recordings is considered *cheating* and will not be tolerated.**
